

Sufficient supply of photovoltaic solar power generation

Overview

In our January Short-Term Energy Outlook (STEO), which contains new forecast data through December 2025, we forecast new capacity will boost the solar share of total generation to 5.

Sufficient supply of photovoltaic solar power generation

[We expect solar will supply almost all growth in U.S.](#)

We expect solar electric generation will be the leading source of growth in the U.S. electric power sector. In our January Short-Term Energy

Advanced photovoltaic technology can reduce land

We find that conventional photovoltaic will require 0.5 to 1.2% of global land area to meet projected energy demands by 2085 without accounting
