

# Tax exemption for energy storage projects

## Overview

---

Using 48E, investors in the development of qualified energy properties and facilities are eligible for a tax credit from normally 30% all the way up to 70% of the cost of the project (in extreme cases) through an Investment Tax Credit ("ITC"). 48E is just one of many clean energy. Tax-exempt and governmental entities, such as state and local governments, Tribes, religious organizations, and non-profits may install energy-generation and storage property to meet energy demands, reach clean energy transition goals, or save money on energy costs. Period of Availability: Projects beginning construction before 1/1/25. For geothermal heat property, the base investment tax credit is 6% for the first 10 years, scaling down to 5. The IRA expanded the investment tax credit by eliminating the requirement. Section 73 of the California Revenue and Taxation Code allows a property tax exclusion for certain types of solar energy systems installed between January 1, 1999, and June 30, 2026.
