

Technical parameters of earthquake-resistant outdoor telecom cabinets

Overview

GR-487, formally known as GR-487-CORE, is a technical standard developed by Telcordia (formerly Bellcore) that specifies the design, construction, and performance criteria for outdoor enclosures used in telecommunications. These enclosures house equipment such as switches, routers, and power. Reinforce cabinets by using vibration-dampening materials and upgrading critical components to enhance durability and reduce failure risks. Follow a systematic process for compliance with seismic standards, including regular inspections and documentation to maintain equipment resilience. Utilize. Keep your company's essential network equipment safe in our series of wall-mounted and pole-mounted cabinets.
