

The world's first solar power generator for home use

Overview

The Institute of Energy Conversion at the University of Delaware created one of the world's first homes that converted solar energy into heat and electricity for domestic use. In a world of coal and hard manual labour, the sun miraculously powered an engine and effortlessly pumped the Nile's water to thirsty crops and parched soil. The very first solar cell was created by Charles Fritts. This setup was sufficient enough to generate an electric current with a little less than 1%. George Cove was a Canadian inventor, known primarily for early solar electric generation equipment. George Cove was born in Amherst, Nova Scotia, in 1863 or 1864. His father Joseph Cove patented many mechanical devices. You can also glimpse the future.
