

Tile trough solar power generation

Overview

There are two major types of linear concentrator systems: parabolic trough systems, where receiver tubes are positioned along the focal line of each parabolic mirror, and linear Fresnel reflector systems, where one receiver tube is positioned above several mirrors to allow the mirrors.

Solar explained

Concentrating Solar Thermal Power Plants
Linear Concentrating Systems
Solar Power Towers
Solar Dish-Engines
Solar dish-engine systems use a mirrored dish similar to a very large satellite dish. To reduce costs, the mirrored dish is usually made up of many smaller flat mirrors formed into a dish shape. The dish-shaped surface directs and concentrates sunlight onto a thermal receiver, which absorbs and collects the heat and transfers it to an engine genera See more on eia.gov
