

Uk renewable energy facts

DISTRIBUTED PV GENERATION + ESS

Overview

In 2024, renewables generated 143.2% of gross final energy consumption. These polls consistently show people are supportive of renewables, and enthusiastic about the benefits that they bring. Our statistics updated regularly include information on offshore wind capacity, onshore wind. With the UK aiming to reach net zero by 2050, a crucial part of the strategy is to transition to an electricity system with 100% zero-carbon generation and much of this is expected to come from renewable energy. 08 MB, 32 pages MS Excel Spreadsheet, 443 KB This file may not be suitable for users of assistive technology. If you've ever wondered how much of our power really comes from wind, how big nuclear still is, or what "imports" actually mean, this update breaks down the UK's energy mix in 2025 - and what it tells us about the road to Net. This page is packed with renewable energy facts and statistics, covering green energy production, consumption, and capacity in the UK.
