

# Using blades to make solar panels

## Overview

---

Today in this video I will show you how to make a solar panel. To make this solar panel you will need an old cell phone battery, aluminum fuel, blades and double sided tabs. These are things that you can find in. While professional solar panel installations are the most common way to harness solar power, did you know you can create your solar panel using simple household items?

This article will guide you through making a solar panel using CDs, aluminum foil, and knife blades. If you're struggling to find a CD try a secondhand store, there's no point in buying brand new ones! Make sure your CD is nice and. Razor blades don't work as solar panels. The back panel is just cardboard: The razor blades are merely glued on: The metal strips are aluminum foil - you can't solder connections to it with. Tabbing Wire and Bus Wire: Used for connecting the solar cells together and routing electricity. Diodes: Install diodes to prevent reverse current flow, ensuring efficient energy production.
