

# Vanadium titanium liquid flow battery cost

## Overview

---

While vanadium titanium liquid flow battery prices typically range between \$400-\$800/kWh for commercial systems, four key factors create this spread: "The sweet spot for VTFB projects is 4+ hours of storage duration. Below that, lithium-ion often wins on price; above it, flow.

Pure vanadium is a bright white metal, and is soft and ductile. It has good corrosion resistance to alkalis, sulfuric and hydrochloric acid, and salt water, but the metal oxidizes readily above 660°C.

### Vanadium

Vanadium is a chemical element; it has symbol V and atomic number 23. It is a hard, silvery-grey, malleable transition metal. The elemental metal is rarely found in nature, but once isolated artificially,

The capital costs of these resulting flow batteries are compared and discussed, providing suggestions for further improvements to meet the ambitious cost target in long-term.
