

What are the methods for cooling photovoltaic panels

Overview

Depending on the working medium, one can distinguish cooling through water, air or hybrid cooling consisting of, e. , phase change material, heat pipes, microchannels, nanofluids or thermoelectric elements, which in various combinations yield higher or lower efficiency.

This review article focuses mainly on various PV and FPV cooling methods and the use and advantages of FPV plants, particularly covering

Cooling techniques for PV panels: A review

Many cooling methods are used to cool solar cells, such as passive cooling, active cooling, cooling with phase change materials (PCMs), and cooling with PCM with other additives
