

Why is solar power generation so cheap

Overview

The first and most important question is why solar energy is so cheap today when it was expensive just a decade ago?

The answer lies in scale efficiency and learning. Solar panel manufacturing has exploded globally. Factories now produce millions of panels every month. This massive scale reduces. In most places, power from new renewables is now cheaper than new fossil fuels. By Max Roser Originally published on December 1, 2020 (partially updated in April 2025) Browse past versions For the world to transition to low-carbon electricity, energy from these sources needs to be cheaper than. Solar energy is now the cheapest source of power worldwide, driving a massive shift toward renewables. Yet, grid congestion and integration remain key challenges. The wind was 22% higher than coal and solar was 223% higher. 02 per kilowatt-hour in the sunniest regions.

Why is solar power generation so cheap
