

Will solar outdoor power cabinet be inspected

Overview

Following the installation, a professional from the local government will inspect the new array to ensure all safety codes have been followed. Permitting and inspection are required before a solar array is allowed to produce electricity on the grid. Property owners need three primary permits: electrical permits for code compliance, structural permits for load-bearing verification, and solar. Solar inspections are essential for maintaining the efficiency and reliability of solar energy systems. Increased solar adoption has inundated many jurisdictions with permit applications and inspection requests. The SolSmart guide is supported by the.
