Wind power is the use of wind energy to generate useful work. Historically, wind power was used by sails, windmills and windpumps, but today it is mostly used to generate electricity. This article deals only with wind power for electricity generation. Today, wind power is generated almost completely using wind turbines, generally grouped into wind farms and connected to the electrical grid.

### Windy API

Get forecast for specified coordinates Obtain data for wind, temperature, precipitation, air quality and other 20 parameters.

### Windy: Wind map & weather forecast

Worldwide animated weather map with layers, precise forecasts, METAR, TAF, NOTAMs for airports, SYNOP codes from stations and buoys, and forecast models.

### [Wind Power Plant: Diagram, Parts, Working & Advantages](#)

In this post, you will learn about the wind power plant and its diagram, working, the importance of wind energy, advantages, application and
